

# ONLINE MEDICAL RECORDS

If you have a computer and/or other electronic access to the internet, you can register to get online access to your medical records.

All you have to do is **visit the surgery** to sign up to the service. Remember to take proof of **identification**, such as a passport or drivers licence and utility bill.

Once you have **registered online**, you will be able to access your GP services at your convenience.

You will then be able to book a future appointment with a GP, view summaries of your medical conditions, look at test results, order repeat prescriptions and view medications, immunisation injections & records of any allergies you have.

You can easily open the “**Patient Access**” homepage by clicking the appropriate link on the Practice’s website.
